Mission Statement

Redstone College is dedicated to providing quality skill-based certificate and degree programs that provide students with the knowledge, skills, and credentials needed to launch, enhance, or change careers.

By providing training and education based on industry standards, we offer students the quality education, training, and service that students need and industry expects. By teaching students the skills and knowledge needed by industry and the work behaviors expected by employers, we empower students to successfully pursue their individual career goals. By serving a diverse, multicultural body of students, we promote teamwork, student pride, and respect for self and others.

An Accredited Education

Redstone is nationally accredited by the Accrediting Council for Independent Colleges and Schools (ACICS).

ACICS and its member organizations are recognized by the Council for Higher Education Accreditation (CHEA).

National accrediting agencies accredit institutions that specialize in instruction and training for a career.

ACICS regularly reviews and approves the qualifications of our faculty, the quality of education, our graduation and employment rates and assures consistency in institutional operations.

Because ACICS is a recognized accrediting body by the U.S. Department of Education, a Redstone education is eligible for federal funding.
“Redstone College helped me achieve my goals, providing me with a solid base education to get my foot in the door into a career I chose.”

JEREMY VIGIL
REDSTONE COLLEGE GRADUATE
Graduate Performance

The following information is the summary of 2014 graduate performance for Redstone College. This information is based upon graduates from July 1, 2013 to June 30, 2014, as reported to ACICS on the Campus Accountability Report. Westwood’s accrediting body ACICS, requires Westwood annually to calculate and report its graduate employment by campus and by program. You can access the complete ACICS definition of placement and calculation formula from their home page at www.acics.org. The placement rates disclosed in this booklet show only the percentage of reporting graduates who obtained entry-level employment in a job utilizing the core skills taught in their degree program and that is reasonably based on the educational objectives of their degree program. The placement rate includes only those graduates (i) for whom information was available and (ii) who are required to be included in the placement rate. For this reason, not all employed graduates are included in the placement rate. The rates are calculated using information provided by graduates or employers.

Employment statistics include all graduates eligible for employment as defined by the individual campus’ accreditation guidelines.

- The statistics for programs that are no longer being offered to new students do not appear on this form; however the total campus results do reflect all programs.
- Students may still be completing programs that are no longer being offered to new students.
- Full-time enrollment is defined as 35 or more hours per week.

* No data during the reporting period.
† Program annual retention = (total program enrollment July 1, 2013 through June 30, 2014 minus withdrawals due to Westwood College campus transfers minus all other withdrawals from the program) divided by (total program enrollment minus withdrawals due to Westwood College campus transfers).
‡ Employment rate = eligible graduates who actively pursued and obtained positions in their education-related careers divided by number of graduates eligible for employment assistance.

For important program disclosure information, including salary information, job titles and employers of our graduates, as well as information about median loan debt and potential occupations from the Department of Education, visit westwood.edu/disclosures.
